Professional Summary

A dynamic and results-driven Computer Science undergraduate from NIT Nagaland, entering the final year of study. Specializing in full-stack web development with the MERN stack and Python, with a proven portfolio of deployed applications. Combines a strong foundation in algorithms and data structures with hands-on experience in building, testing, and deploying scalable software solutions in cloud environments.

Technical Skills

- **Languages:** C++, Python, JavaScript (ES6+), SQL, HTML5, CSS3
- **Frameworks & Libraries:** React.js, Node.js, Express.js, Flask, Socket.IO, Tailwind CSS
- **Databases:** MongoDB, MySQL, PostgreSQL, SQLAlchemy
- **Cloud & DevOps:** AWS (EC2, S3, RDS), CI/CD with GitHub Actions, Vercel, Render
- **Developer Tools:** Git, GitHub, Docker (Basic), Postman, Vite, Figma
- **Core Concepts:** Data Structures Algorithms (DSA), Object-Oriented Programming (OOP), RESTful APIs, MVC Architecture

Education

National Institute of Technology (NIT) Nagaland
B.Tech in Computer Science and Engineering (Expected May 2026)

Dimapur, Nagaland
CGPA: **8.71** / 10.0

Projects

Real-Time Chat Application

React, Node.js, MongoDB, Socket.IO, JWT

[Live Demo](#)

- Architected and deployed a full-stack, real-time chat service featuring instant messaging, online presence indicators, and image sharing capabilities.
- Engineered a secure backend with JWT-based stateless authentication and bcrypt hashing; implemented a bidirectional communication layer using Socket.IO for seamless, low-latency message delivery.

AI-Powered Image Generator

React, Node.js, MongoDB, Razorpay API

[Live Demo](#)

- Developed a full-stack AI image generation platform with a credit-based usage system for monetized API access.
- Integrated the Razorpay payment gateway for secure credit purchases and implemented protected routes to manage user authentication, credits, and image history.

AI Chat Application (Gemini Clone)

React, Vite, Google Gemini API, Context API

[Live Demo](#)

- Engineered a responsive AI chat interface replicating Google Gemini's UI, enabling real-time, streaming responses directly from the Google Gemini API.
- Implemented robust global state management using React's Context API to handle conversation history, user input, and loading states across components.

Airbnb Clone Web Application

Node.js, Express.js, EJS, MongoDB

[Live Demo](#)

- Constructed a full-stack property rental platform using an MVC architecture, featuring user accounts, property listings, booking management, and user reviews.
- Built and integrated RESTful APIs for all CRUD operations, ensuring seamless data flow between the server-side rendered frontend and the MongoDB database.

Accomplishments

- **LeetCode Knight:** Achieved a peak competitive programming rating of **1,869**, demonstrating advanced problem-solving skills in algorithms and data structures.
- **Codefiesta - National Runner-up:** Secured **2nd Place** in a national coding competition sponsored by MeitY, Government of India.
- **Certification:** Full Stack Web Development (MERN) Certificate  May 2025
- **Certification:** C++ with Data Structures Algorithms Certificate  July 2025

Leadership Communication

- **Project Lead, NIT Nagaland Science Society (2023-2024):** Led a team of three students to design, build, and present a sensor-based weather monitoring system using Arduino and Python, showcasing the project at the annual university Tech Fest.
- **Public Speaking (Radio 90 FM):** Selected for a radio interview to distill complex exam strategies into clear, actionable advice for a broad audience, demonstrating strong communication and presentation skills.
